Open-loop (no sensor)				•	7

Features

- Motion controller and drive in a single compact unit based on MotionChipTM technology
- Universal solution for control of rotary and linear brushless, brushed and 2 or 3-phase step motors
- Advanced motion control capabilities (PVT, S-curve, electronic cam)
- Motor supply: 11-80V; Logic SELV/ PELV supply: 9-36V; STO SELV/ PELV supply: 18-40V
- Output current: 20A cont. (BLDC mode); 40A_{PEAK}, up to 60kHz PWM
- Feedback Devices (dual-loop support)
 - 1st feedback devices supported:
 - Incremental encoder interface (differential)
 - Analogue sin/cos encoder interface (differential 1V_{pp})
 - Digital Hall sensor interface (single-ended and open collector)

- 2nd feedback devices supported:
- Incremental encoder interface (differential)
- BISS / SSI encoder interface
- pulse & direction interface (differential) for external (master) digital reference
- STO: 2 safe torque-off inputs, safety integrity level (SIL3/Cat3/PLe) acc. to EN61800-5-1; -2/ EN61508-3; -4/ EN ISO 13849-1.
- 4 digital inputs, 12-36V, PNP/NPN programmable: 2 for limit switches, 2 general-purpose
- 4 digital outputs, 5-36V, NPN open-collector: Ready, Error, OUT1 0.5A and OUT0 2A
- 2 analogue inputs: 12 bit, +/-10V and 0-5V: Reference and Feedback (for Tacho) or general purpose
- RS-232 serial & dual 100Mbps RJ45 EtherCAT® interfaces
- EtherCAT® with CAN application protocol over EtherCAT (CoE)
- 127 h/w addresses selectable by DIN switch
- 16k x 16 SRAM memory for data acquisition
- 16k x16 E²ROM memory to store setup data, TML motion programs, cam tables and other user data
- Operating ambient temperature: 0-40°C (over 40°C with derating)
- NTC/PTC analogue Motor Temperature sensor input
- Protections: short-circuit between motor phases and from motor phases to GND, over/under-voltage, over-current, I²t, control error, over temperature, communication error

Electrical characteristics

All parameters measured under the following conditions (unless otherwise specified):

- Tamb = 24°C, VLOG = 24 VDC; VMOT = 80VDC
- Supplies start-up / shutdown sequence: any
- Load current (sinusoidal amplitude / continuous BLDC, DC, stepper) = 20A

Operating temperature can be extended up to **+65°C** with reduced current and power ratings. POS8020 BX-CAT can be operated in vacuum (no altitude restriction), but at altitudes over 2,500m, current and power rating are reduced due to thermal dissipation efficiency. It is recommended to mount the iPOS8020 BX-CAN on a metallic support using the provided mounting holes, for better reliability and reduced de-rating due to heat dissipation Stresses beyond values listed under "absolute maximum ratings" may cause

¹ Stresses beyond values listed under "absolute maximum ratings" may cause permanent damage to the device. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

 $^{^2}$ All differential input pins have internal 120 $\!\Omega$ termination resistors connected across $^\circ$

³ "FS" stands for "Full Scale"

iPOS8020 BX-CAT Output Voltage De-rating with PWM frequency1

iPOS8020 BX-CAT De-rating with altitude

CAUTION! OR PWM FREQUENCIES LE

FOR PWM FREQUENCIES LESS THAN 20 KHZ, CORRELATE THE PWM FREQUENCY WITH THE MOTOR PARAMETERS IN ORDER TO AVOID POSSIBLE MOTOR DAMAGE.

 1 V_{OUT} – the output voltage, V_{MOT} – the motor supply voltage
